

KUSHAGRA KATIYAR

Gainesville, Florida

240-704-1066 k.katiyar2006@gmail.com [linkedin.com/in/kushagrakatiyar](https://www.linkedin.com/in/kushagrakatiyar) github.com/KushagraKatiyar06

Education

University of Florida

B.S. Computer Science, Minor in Statistics, AI Certificate

GPA: 3.9/4.0

Gainesville, Florida — April 2027

Technical Skills

Languages: Python, C++, TypeScript, JavaScript, SQL, R

Frontend: React, Next.js, Three.js, Angular, Ionic, Tailwind CSS, HTML/CSS, WebSockets

Backend & Data: Flask, FastAPI, Node.js, PostgreSQL, Redis, Docker, Git, CI/CD, REST APIs

Cloud & DevOps: AWS, GCP, Cloudflare Workers, Linux, Bash, Shell Scripting

Design: Figma, Framer, Blender, Adobe InDesign, Adobe Photoshop

Certifications: Fundamentals of Deep Learning (NVIDIA), Adobe InDesign, Adobe Photoshop

Relevant Coursework: Data Structures and Algorithms, Software Engineering, Operating Systems, Database Management, Computer Architecture, UX Design, Business Analytics and AI

Honors & Awards

2nd Place Overall Space Coast Initiatives Hackathon - Won amongst national participants and real engineers

April 2026

1st Place HackUSF (Cybersecurity Track) - Won amongst state teams

March 2026

1st Place SASEHacks (Gamification & Best Use of Blender)

March 2026

1st Place UFGUD Designathon (Best Use of Framer)

February 2026

Work Experience

Primo Brands

May 2026 – Present

Software Engineering Intern (AI & Digital Experience) | Python, React, TypeScript, REST APIs

Tampa, Florida

- Building enterprise internal web tooling to automate IT workflows, serving cross-functional teams.
- Designing user-facing interfaces for knowledge retrieval, collaborating with stakeholders on requirements.
- Enforcing data validation using **Pydantic**, ensuring consistent and reliable outputs across internal tools.
- Presenting tooling evaluations and feature recommendations to **senior leadership**.

University of Florida

January 2026 – Present

Undergraduate Research Assistant | Python, Matplotlib, Pandas, React, REST APIs

Gainesville, Florida

- Built data visualization dashboards with **Matplotlib** reporting evaluation metrics across **200+** documents.
- Developed a data processing pipeline reducing payload sizes from **25,000** to **1,000 tokens**.
- Validated structured outputs and visualized results to support research teams across **5+** elementary schools.

English2Success

February 2025 – July 2025

Software Engineering Intern | Python, Flask, PostgreSQL, Docker, Google Cloud

Lake Mary, Florida

- Designed and maintained a full-stack **Flask** dashboard growing the platform from **200** to **450+** global members.
- Built automated reporting pipeline saving **8 hrs/week**, deployed via **Docker** on **Google Cloud**.
- Integrated Gmail API and Service Accounts to schedule and automate **50+** weekly user-facing workflows.

Kickstand Technologies

May 2023 – August 2023

Software Engineering Intern | TypeScript, Angular, Ionic, HTML, CSS

Winter Springs, Florida

- Built reusable **TypeScript** UI components for a cross-platform mobile app with **50,000 downloads**.
- Developed **Angular** and **Ionic** countdown displays and data filters, optimized for iOS and Android.

Projects

Neuromuscular Monitor | Kotlin, Android, CameraX, MediaPipe, Canvas

Spring 2026

- Built an Android medical app with custom **Canvas** UI components: scrolling waveform graph and live bounding overlay.
- Architected with **MVVM** + **SavedStateHandle**, fragment-based navigation, and modular component pipeline.
- Deployed on-device **MediaPipe** ML model at **60 FPS** with **CameraX**, driving UI state from live inference results.

(Hackathon Winner) Buddy Lock In | React, Three.js, React Three Fiber, Blender, Socket.io

March 2026

- Built a real-time 3D study room in **Three.js** with **8 Blender**-exported animated pet companions.
- Architected a **React** + **React Router** phase state machine driving login, session, and recap transitions.
- Designed **Canvas** particle system, neon focus rings, and **WebSocket**-driven live UI — shipped in **24 hours**.

3D Interactive Portfolio | React, Three.js, React Three Fiber, Drei, Vite

May 2026

- Built a **Three.js** 3D scene with a 5-stage spring/damper cursor physics system running at zero React re-renders.
- Engineered adaptive **DPR** rendering (0.45–0.8) with full **WebGL** context release when scene is not visible.
- Designed custom camera easing with exponential decay and Lissajous idle oscillation — zero external UI libraries.

Artist Website | Next.js, React, TypeScript, Tailwind CSS, Cloudflare Workers

Spring 2026

- Delivered a **Next.js** website for a Swamp Records artist with **Tailwind CSS** v4 and **Cloudflare Workers** edge deploy.
- Built reusable **React** components: accordion lyrics, polaroid galleries, and fluid **clamp()** responsive typography.
- Designed custom CSS tokens, repeating-gradient textures, and **3** responsive breakpoints for mobile and desktop.
